

Usman Murtaza

FULL STACK DEVELOPER

Karachi, Pakistan • usmanmurtazaportfolio@gmail.com • usmanmurtaza.netlify.app

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience designing, building, and deploying production-ready web applications using React, Node.js, and modern JavaScript tooling. Creator of the Maniesta ecosystem - 10+ web products spanning education, AI-assisted tools, productivity, and everyday utilities. Skilled in front-end architecture, REST APIs, database design, and end-to-end product delivery. Focused on clean component architecture, responsive design, and shipping working software.

TECHNICAL SKILLS

LANGUAGES	JavaScript • TypeScript • Python • PHP • HTML5 • CSS3
FRONTEND	React.js • Next.js • Redux • Tailwind CSS • Bootstrap • Material UI
BACKEND	Node.js • Express.js • REST APIs • GraphQL
DATABASES	MongoDB • PostgreSQL • MySQL • Firebase
TOOLS	Git • GitHub • Docker • Google Cloud Platform • VS Code • Figma
APIS & AUTH	OpenAI API • JWT • EmailJS • Leaflet • Weather API
TESTING	Jest • Vitest

EXPERIENCE

Full Stack Developer

Jan 2023 – Present

Freelance • Remote / Karachi, Pakistan

React • Node.js • Express • PostgreSQL • MongoDB

- Designed, built, and deployed full-stack web applications for clients across e-commerce, education, and services using React, Node.js, and modern JavaScript tooling.
- Delivered complete front-end interfaces, REST APIs, authentication systems, and database schemas - from initial requirements through production deployment.
- Worked directly with clients to translate business needs into working products, handling UI/UX implementation and post-launch iteration.

Team Lead - Academic IT Projects

2024 – Present

ILMA University • Karachi, Pakistan

- Lead a team of students on academic software development projects covering web applications, database implementation, and front-end development.
- Coordinate task distribution, technical reviews, and delivery milestones across term-based projects.
- Act as the primary technical reviewer - reviewing code, debugging issues, and helping teammates resolve implementation challenges.

- Teach foundational and intermediate computer science and web development concepts, covering HTML, CSS, JavaScript, and modern tooling.
- Deliver hands-on sessions with live coding demonstrations and project assignments that connect theory to implementation.
- Provide one-on-one support to help students debug their work and understand core programming concepts.

SELECTED PROJECTS

ResumeAI Pro - AI-Powered Resume Builder (SaaS)

2025

React · Firebase · Tailwind CSS · OpenAI API

- Built an AI-powered resume builder that generates ATS-optimised content using the OpenAI API, with a customisable editor and one-click export.
- Implemented Firebase authentication, multi-resume management, and a user dashboard for saving and exporting resumes.
- Structured AI generation to minimise token usage while keeping response times fast and predictable.

resumeaixpro.netlify.app · github.com/usmannmurtazaa/ResumeAI-Pro

Maniesta Campus - Campus Management System

2025

React · Node.js · Express · MongoDB · JWT · Tailwind CSS

- Designed and built a role-based campus management platform with separate dashboards for admins, faculty, and students.
- Implemented RBAC middleware with JWT authentication, course enrolment, grade tracking, and real-time notifications.
- Architected the data model and API to support multiple user roles with consistent records across modules.

maniestacampus.netlify.app · github.com/usmannmurtazaa/maniesta-campus-os

Zain Real Estate - Property Listing Platform

2025

React · Node.js · Express · PostgreSQL · Leaflet · Tailwind CSS

- Built a real estate listing platform with advanced search filters, interactive map integration via Leaflet, and user dashboards for buyers and agents.
- Implemented the back-end API and PostgreSQL schema for property listings, users, and enquiries.

zainrealestate.netlify.app · github.com/usmannmurtazaa/ZainRealEstate

Maniesta Suite - Productivity Tools Collection

2025

React · Redux · Node.js · Express · MongoDB

- Developed a modular suite of productivity tools (notes, tasks, calendar) sharing a unified state layer via Redux.
- Designed the architecture so new tools could be added without disrupting existing modules.

maniestasuite.netlify.app · github.com/usmannmurtazaa/Maniesta-Suite

Nexa Calculator - Multi-Purpose Calculator

2025

React · JavaScript · CSS

- Built a multi-purpose calculator covering GPA/CGPA computation, scientific functions, and basic arithmetic in a single responsive interface.
- Engineered the calculation logic to handle both academic formulas and scientific functions accurately.

nexacalculator.netlify.app · github.com/usmannmurtazaa/NexaCalculator

Al Falah Leather - Independent Web Project

2023

React · Node.js · Express · PostgreSQL

- Built the official website for Al Falah Leather covering both front-end and back-end features, including responsive layouts and smooth navigation.
- Handled the full build - from interface design and implementation through deployment.

Maniesta Ecosystem - Consolidated Products

2025

React · Netlify

- Created and shipped multiple specialised web products under a single brand identity: Maniesta (hub), Maniesta Veyra, Maniesta Travel, Maniesta Digital, Maniesta School, Maniesta One, Maniesta Label, Maniesta Play, Maniesta Weather, Maniesta Notes, and Maniesta Resume AI.
- Each product follows a shared design system, typography, and component library for consistency across the ecosystem.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Aug 2024 – Present

ILMA University, Karachi · **GPA 3.6**

FSc Pre-Engineering

2022 – 2024

Army Public College, Saddar

Matriculation - Bio Science

2018 – 2022

Fazaia Intermediate College, PAF Base Korangi Creek

CERTIFICATIONS

- **Modern Web Application Development** Saylani Mass IT Training (SMIT), 2024
- **Graphic Design** Saylani Mass IT Training (SMIT), 2024
- **UI/UX Design** Coursera
- **Instructional Design Foundations and Applications** Coursera

TECHNICAL WRITING

Dev.to - 3 published technical articles · dev.to/usmanmurtaza

- "How I Built Maniesta Campus: A Campus Management System with React and Node.js" - technical walkthrough covering RBAC middleware, JWT authentication, and building role-based dashboards in React.
